Title: Bad For You

download from: <http://www.lyricsdisc.com>

I can't lie and say i dont hate you
you ever make me feel any good about me
its too long now since you and me showed faith
and you shouted, wont you stay forever young, alright ooh

iiii, i dont want you anymore, i dont need you anymore i cant see you anymore im drowning around you oh, you make me feel no good, i feel empty and alone wont complain about

all my life i chose to accept you
other tigers, come and go throughout the night, the night, the night, the night
and oh but your hair, you be to stay the way you are
i cant follow, in your foolish ways, again, my love

cos i dont want you anymore i dont need you anymore, i cant see you anymore, im drowning around you, oh, you make me feel no good, i feel empty and alone wont complain about
x2

ooh, had enough of it all, too now, oh now, lalala, enough of it all
