Title: Beyond the Mirror

download from: <http://www.lyricsdisc.com>

There it is stuck on the wall
Your reflection comes back to make you fall
What lies beyond is in you head
Look into the mirror, why are your eyes red
Beyond the mirror, why do you always stare
Beyond the mirror is future or past
Look inside it, be put to the test
It knows what happened
What will to be
The mirror will never set you free
Someone's inside it
It's looking at you
It knows what happened and what you will do
Is it your conscience or imagination
Self induced high or sever depression
Can you ignore its backwards world
The past has always been foretold
Ever since you hung that mirror in your room
Your mind has wandered from appearance to gloom.
