

Chance

People watching, every life a mystery
Sunny faces, but you know the story's incomplete
Satisfaction, seems a million miles away

So I'm moving to another state of mind
I'm believing there's no better place or better time

Chorus

Every day we live, there's a chance to give
Every time we speak, there's a chance for peace
Every day we live, there's a chance

Little sister, put aside your fear and breathe
In the secret, do you hear the voice of heaven saying'
Come together, hope is stronger than it seems

Where you're standing there's no running out on love
Only human, but you've set your eyes on the things above

Chorus

Every day we live, there's a chance to give
Every time we speak, there's a chance for peace
Every day we live, there's a chance

A chance for you, a chance for me
A chance to serve, in a time of need
A chance to live, a chance to tell
A chance to lose yourself (for somebody else)
