

Woke up, got out of bed  
Drag the covers back again  
I heard the phone ring in the hall  
And thought of you through it all... 'cause

Every night I fall  
Every night I fall into you  
You've got me in a cycle high above  
And I can't help but fall

You can sit and watch the sun  
Or count the stars one by one  
Stand still for hours on end  
And I'd have to catch my breath... and

Every night I fall  
Every night I fall into you  
You've got me in a cycle high above  
And I can't help but fall

BRIDGE

Oh, you move me with every move you make  
And I could never hide what's on my face  
Even if you will be gone tomorrow  
Oh, you should know, that...

Every night I fall  
Every night I fall into you  
You've got me in a cycle high above  
And I can't help but fall

Every night I fall  
Every night I fall into you  
You've got me in a cycle high above  
And I can't help but fall
