Title: Everyone Pushed Down

download from: <http://www.lyricsdisc.com>

You gotta burn that building down
I would love to see that world
come crashing down

You gotta burn that building down
I would love to see that world
come crashing down

Did you know your actions affect all the life?
Could you pay attention to it just one time?
When you're thinking up your mind, do you complain?
Everyone pushed down in your heart, in your soul say

You gotta burn that building down
I would love to see that world
come crashing down

You gotta burn that building down
I would love to see that world
come crashing down

Then the people under, could come crawling out
See the sun for the first time it would burn them without a doubt
But that burn would feel so good, and so warm it would,
let them finally feel life and be born again
Everyone pushed down in your heart, in your soul say

You gotta burn that building down
I would love to see that world
come crashing down

You gotta burn that building down
I would love to see that world come,
love to see that world come, down, DOWN
