

Never, never, never, never

Obsession, we hide in the back  
And devotion's finding a way  
When highness exists for those people who pray

Every day is like a start  
Ups and downs, tears and laugh  
We never stop, just fight

Never let nobody in  
And step right on your dream  
If you really wanna take this trip  
Fighting anywhere we go  
To face this cruel world  
We gotta just fight forever

Believing, forfeiting the past  
The onfall's adapting the hearts  
Itch people will gnaw our wishes, no more

Every day is like a start  
Ups and downs, tears and laugh  
We never stop, just fight

Never let nobody in  
And step right on your dream  
If you really wanna take this trip  
Fighting anywhere we go  
To face this cruel world  
We gotta just fight forever

Fighting anywhere we go  
To face this cruel world  
We gotta just fight forever
