

Gather round there's a story in the making
Doors are unlocking chains are breaking
Wherever you go people they are stating
The right to know end of dictating
To take what is rightfully theirs
They know the fault that make the repairs
Fixing the future the impossible dream
It's only the beginning of a flowing stream
In a moment of triumph the walls came down
No hold barred no more frowns
Free to walk from border to border
Free to the things they ought to have done years ago
Didn't have a chance and now they'll grow
The chance has come, a land as one
East and West the story's just begun
Fix the future, stay on the right track
Pack your things no looking back
Fix the future South African dream
Release the tension let off some steam
Fix the future of Eastern lands
Wall came down so it's in your hands
Fix the future optimism is life
If you don't think so, you better think twice
Fix the future
Fix the future now
Fix the future
Fix the future now
State of shock and a state of emergency
Surely that's how it wasn't meant to be
Being held down in our own territory
Bound to cause a major catastrophe
In the life of the majority controlled by a power
That stepping out totally
Yes it's dead and gone
Put the people up where they belong
Fix the future, stay on the track
Pack your things no looking back
Fix the future South African dream
Release the tension let off some steam
Fix the future
Fix the future now
Fix the future
Fix the future now
