Title: Get where i belong

download from: <http://www.lyricsdisc.com>

---

Help me to repair  
Things i have done wrong  
Help me to find a way  
To get where i belong  
All you can say  
When you're feeling this way  
Is that somebody needs you  
And wants you to stay  
And all you can do  
When your something is through  
Is take all your time  
Don't let it get you blue

Help me to repair  
Things i have done wrong  
Help me to find a way  
To get where i belong

There' too many people  
In this whole emptiness  
Trying to find  
A little happiness i hope

Too many people  
Just hiding their face  
And i'm hiding my face  
In this lonely lonely place

Help me to repair  
Things i have done wrong  
Help me to find a way  
To get where i belong

If you need any help baby  
To maybe open your mind  
Just give me a call  
And i'll be right there on time  
Just give me one reason  
To stand in your light  
And i would stand in your light  
Till my night is right

Help me to repair  
Things i have done wrong  
Help me to find a way  
To get where i belong  
Oh! to get where i belong  
Gonna get where i belong  
Gonna get where i belong.
