

Everybody gather 'round now;  
Looks like we've got ourselves a,  
Science project. Oh, yeah.  
Anybody got the blueprints?  
Circumvent the navigation.  
Don't get the wires mixed up.  
Drop the D string. Take your stations.  
We're gonna crank it out now.  
I've got my guitar and you've got your 2600.  
I loved your Atari, but you hated my Gibson.  
Should I switch my pickups for a pair of cartridges?  
Should I ditch my JD pick for a digital joystick?  
Turn the dials. Flip the switches.  
Goddamn you've got the input,  
On the wrong end of the system.  
My God, we're gonna feedback.
