Title: I'll show you

download from: <http://www.lyricsdisc.com>

I can see right through this veil
Thinly strown across your face
Whisper something in my ear I only need a trace

I can only read your mind
When you look into my eyes
A little deeper and we'll find
What we've both been looking for

Why are you hiding
Behind all this silence
I just need some time

If you would give me a chance I'll show you
If you would take me away I'll go with you
Until the end of days
Where no one else listens to a word you say
I'll show you

I can feel you by my side
Every time that you're away
The only way I can survive
Another empty day

I take a sigh of sweet relief
As you walk into the room
As you enter I'm complete
Gone tomorrow, all to soon

A change in the season
Gives me a reason
To keep it alive

(chorus)

If you'd give me some time
I'd make it alright around you
If you'd give me a chance
To open your hands

(chorus)
