Title: International Space Station II

download from: <http://www.lyricsdisc.com>

---

Do you remember the day we left the Earth?  
I thought it was for good

It's been two years since then I think  
At the time we thought we should

But I miss the blues, I'll miss the greens  
I liked humans more than machines

Our families are so far away  
As we floated around in space

But even though we miss our friends  
The love we share will never end

International space station  
Join your arms across our nations  
The time has come to return to Earth  
But we must back our things first

Don't cry  
We'll be back soon  
From up so high  
Beyond the moon
