Title: Into The Darkness

download from: <http://www.lyricsdisc.com>

Floating up
I'm floating high up far into the stars
Below I feel it beneath me give away
Earth below I feel around me
Echoes of the world dissolve
This feels like a dream now
Then it calls
And it feels so real
And then light fades away

Darkness pulls me away
I'm falling into nowhere
I can't see anything
I want it over now

Higher now
I'm high above the stars light years away
Alone this must be a dream now until I feel
Terrified I'm falling fast down into the abyss
The Void is calling me into somewhere else
And it knows my name then my soul slips away

Darkness pulls me away
I'm falling into nowhere
I can't see anything
I want it over now
Death comes knocking again
I'm falling into darkness
I can't feel anything
I guess it's over now

Falling into nothing
Feel my soul now
Slipping away
