

Coming at you like the Jackson 5  
Live in effect, respect due  
You knew we drew lines to make it through  
Completely submerged on the verge I'm thinkin'  
I want to urge and encourage and you know we  
Bringin'  
Second level on the devil minded ego  
And going strong it's the God anointed cinco  
Even though up here and appear to please  
Stay on my knees with the greatest of these, love  
Made of pure intention, let me mention it's like  
If it wasn't for Christ then I'd drop this mic  
And walk away stray minded and annoyed  
Pray every night that it fulfill my void  
So what you want to do?

watch this escalate to more than you hoped for  
Can you feel the same?

We know the words you say (we know the words you say)  
They reinvent the lies, but we're the same in time  
This time He will wash away the tears you cry. (2X)

One mic, one night, once chance to get it right  
Open up the show, stepping into the spotlight  
Well who am I now? Watch me control the crowd  
People wondering how, do the freestyle  
We'll set up the set, we'll show the show  
We're mile to mile, yo it's time go  
Fill up the tank and let's hit the road  
Working uphill until we explode  
So give me the mic and let me rock  
I will rock it  
The spirit inside like Mr. T-N-T  
There ain't no stoppin' it  
So let's take it to the world that's full of stars  
And introduce them to the One who made them  
Who they are  
Cause I represent the heaven sent oh so lovely  
Only when G-O-D be the one inside of me  
Rockin' it, not in the flesh  
Come listen to the sound coming out of the  
Northwest now

watch this escalate to more than you hoped for  
Can you feel the same?

We know the words you say (we know the words you say)  
They reinvent the lies, but we're the same in time  
This time He will wash away the tears you cry. (3X)

Our hearts in places mending  
You know this moves through your endings

We hold strong through suffering eyes  
You'll see the fear within us die  
We belong here side by side  
I'll be the one to life You high  
They cast me out  
I can't go on without feeling in doubt  
We need the peace that only You can give us

We know the words you say (we know the words you say)  
They reinvent the lies, but we're the same in time  
This time He will wash away the tears you cry. (2X)

J-5 what you want?  
Collaborate for real  
We lockin' down from the compound on  
Capitol hill  
Fittin' the bill  
Tell me what you'd do if I said: I still believe  
Christ is God  
And rose from the dead, fillin' your head  
With dances with the songs I found  
With this sound, put it down West coast  
Underground  
So really, where would we be if not free?  
I know we rise agains through Romans 3:23  
Falling up to race in places you all fall  
And all I did would be the same like Paul Wright  
Back to You into peace and hope and You are  
Standing there

Arms wide open
