

from How Did You Find Me Here?
.....

The warm water beads as it runs down the curves
Of the beautiful surface so tan
She's polishing the Jaguar again

Hasn't run in a year or two
Nice car but the wheels don't move, anymore
Maybe she remembers
Maybe something's got her scared
It's too precious to be careless
And it's finally been repaired

So you never see her drive it
She won't risk it any more
It's too easy to collide it
And it hurt so much before

Chorus
Could it be
That it's really just a vehicle
Standing like a statue all this time
Could it be
Its just a vehicle
She shines

Looks good but she still feels blue
Great shape but she's not so new, anymore
She's always got her work out
Every day when she gets home
She can see her own reflection
In the mirror on the chrome

When she's feeling empty
Hollow at the core
She sees it's going nowhere
And she knows there must be more

Chorus

The warm water beads as it runs down the curves
Of the beautiful surface so tan
She's polishing the Jaguar again

Chorus

.....
