

Hey hey hey we got no time to burn  
There's only time for us to live and learn  
Yeh, hey hey you know it's plain to see  
That what will be will always be  
Yes we live and learn no time to burn  
That is the truth no need to be stern  
As long as you know the facts and never lack  
The will to learn and not to spurn  
Chances that may come your way  
No point wishing for another day  
Take today while there's hope for tomorrow  
Time is too short and you cannot borrow  
We live and learn yes we live and learn  
We live and learn yes we live and learn  
We live and learn yes we live and learn  
We live and learn and learn to live  
There comes a time in all of our lives  
To face the truth without no disguise  
All the consequences leading right through to confusion  
Of what to do seems to be no solution  
Time will tell but it won't tell no lies  
Another day over take it in your stride  
Turning misfortune into inspiration  
Has got to be the only inclination  
We live and learn yes we live and learn  
We live and learn yes we live and learn  
We live and learn yes we live and learn  
We live and learn and learn to live  
Just like a game being played  
Another piece is made  
You may not find it now  
But in another day, in another game  
We will win somehow  
Yes we live and learn no time to spurn  
Yes we live and learn no time to spurn  
Hey hey hey we got no time to burn  
There's only time for us to live and learn  
Yeh, hey, hey you know it's plain to see  
That what will be will always be  
We live and learn yes we live and learn  
We live and learn yes we live and learn  
We live and learn yes we live and learn  
We live and learn and learn to live  
(repeat)  
Hey hey hey we got no time to burn  
There's only time for us to live and learn  
Yeh, hey, hey you know it's plain to see  
That what will be will always be
