

I've seen it come and I've watched it go  
The ins and outs and the highs and lows  
Well I gave my heart and I paid the cost  
For the loves I made there were friends I lost  
At the point I'd almost had enough  
Like the morning sun you woke me up  
You held me close and you help me see  
Oh you made a believer out of me

Now I'm alright  
I've got you in my life  
And I've never felt love feel so right

It's a miracle and a mystery  
How the hands of fate brought you to me  
I had lost all hope, I had lost all faith  
With each kiss you loved my fear away

Now I'm alright  
I've got you in my life  
And I've never felt love feel so right

Well it's good to feel and for once I know  
That I'll never have to worry about you letting go  
No matter where the road may lead  
As long as I've got you with me

I'll be alright  
I've got you in my life  
Now I'm alright  
And I've never felt so love feel so right  
Never felt love ever feel so right  
Never felt love ever feel so right  
Never felt love
