Title: Starborn

download from: <http://www.lyricsdisc.com>

We are star born - children of the cosmic dust
Walking the soil a short time decaying like rust
A journey through the ages
On the big blue sphere

It's a walk through the stages
Over thousands of years

Through the night and through the light
We have travelled a long time
Mother Earth ship, are we going nowhere

Walk on through the ages
Corrupting the earth
It's a walk through the stages
In the great space of birth

We come from the stars
Creatures we are
No chains no bars
Can stop the evolution car

In the quest for knowledge
We have to open our hands
Try to be receptive and not
Write it down in sand

Walk on through the ages
A perpetual change
It's a walk through the stages
Search again and again

Astral travellers from the soil
We are burning the midnight oil

Do we ever get to shore
Are we ever gonna stop
Human race wants more and more
Is there still some hope

Walk on through the ages
A perpetual change
It's a walk through the stages
Search again and again

We come from the stars
Creatures we are
No chains no bars
Can stop the evolution car

Astral travellers from the soil
We are burning the midnight oil
It's the mankind's eternal curse
It's the order of the universe
