Title: Such A Fool

download from: <http://www.lyricsdisc.com>

12 o'clock in the morning, and i'm chilling with some friends
Before the club we're hangin out until this girl walked in
Come on by surprise when she didn't say hello
Had an attitude, why be so rude I know just what to do
pull the girl outside and politely came runnin
Told the girl don't act this way
I see right through your game
What he did was such a shame
Don't be living with this man

So let it go tonight
I see the beauty within your eyes
So let it go tonight

I never thought that it would be me
I can lie I'm such a fool oooh
And here I am saying girl im sorry
For something i didn't do, this is my point of view
Baby i never meant to fall for her
Lately its been driving me crazy
Baby baby, you still and always will be my baby
Oh yea..

Its 4 o'clock in the morning and it didn't take too long
For the girl to change her tune and now shes singin a different song
She's all up on me, kissing on me, grinding on me
Whats a guy to when his brain is all muted
Baby I'm not that guy
I already got that someone in my life
pretty I'm not that guy

I never thought that it would be me
I can lie I'm such a fool oooh
And here I am saying girl I'm sorry
For something i didn't do, this is my point of view
Baby never meant to fall for her
Lately its been driving me crazy
Baby baby, you still and always will be my baby

I let her in it only for a minute girl
She was up in my mind
But it was you I found a start
You'll always have my heart
Say my heart

I never thought that it would be me
I can lie I'm such a fool oooh
And here I am saying girl I'm sorry
For something i didn't do, this is my point of view
Baby i never meant to fall for her
Lately its been driving me crazy
Baby baby, you still and always will be my baby
I never thought that it would be me
I can lie I'm such a fool oooh
And here I am saying girl I'm sorry
For something i didn't do, this is my point of view
Baby i never meant to fall
Lately you know I'm so sorry
Baby baby, you still and always will be my baby
