Title: The way we're created

download from: <http://www.lyricsdisc.com>

The way fire flames up
The way horn is sounded
The way flood sweeps you away
The way mud buries you

Is how we come out of the nothingness

The way a heart can get cold
The way a minute passes by
The way the sun sets
The way birds soar to the sky

Is how we go on into the nothingness

The way magic works
The way a heart can love
The way day and night
Deep and high unite

Is how we gonna be one

We are gonna be one
The way a heart can love
We go on into the nothingness
Like the unbroken soul into the universe
We come out of the nothingness
Like the homeless bird flies out of the forest
