Title: Time stood still

download from: <http://www.lyricsdisc.com>

You made my world go round, but now its upside down time stood still, when you said goodbye you made my heart complete, then broke it at my feet time stood still, when you said
And now the seasons dont change, the days have no names today is like yesterday,
I lean on the wine but your memories like time, baby want stay away to get you off my mind, just takes a little time but time stood still,
When you said goodbye
