Title: Vacant Planets

download from: <http://www.lyricsdisc.com>

Mysterious object of flight on a voyage
To correct what they have done, what we are doing
Perhaps submerged, living in the inner most
Recesses of the planet - no choice but
To adapt to an underground world
Limiting our passages of thought
Are they the examples of regression
A life form's abusive progression
In a realm so vast, we sit among the Vacant Planets

[Solos: Masvidal, Schuldiner]

So many worlds yet to be seen that once have shared
The same effects that come from greed, mass production
Perhaps submerged, living in the inner most
Recesses of the planet - no choice but
To adapt to an underground world
Limiting our passages of thought
Are they the examples of regression
A life form's abusive progression
