Title: Visions of a future

download from: <http://www.lyricsdisc.com>

The years go by and things have changed and many things are no long gone
And things are getting worse but still you say there's nothing wrong
What makes you think there'll be a change
What makes you think the future's so bright
Do you really believe what you're saying
What makes you think you're so right

CHORUS

Visions of a future but what's the cost
take a step back and see what's going on
before it's all lost

They say that we're so advanced but we haven't gotten that far
We may be heading forward but we're heading for a fall
What makes you think you've got a chance
What makes you think you're so right
I can't believe what you're saying
Don't tell me I haven't got the right

CHORUS
