

(S. Lambert/S. Byrd)

One touch like never before
Calling out for loving
Calling out for more yeah
heartbeat was never the same
Since you called me honey
Won't you call me back again

You know, you know what I want yeah yeah
You know, you know what I want
I want a lover who knows how to please me

I want you to want me
I want you to want me back again
I want you to want me
I want you to want me back again

One kiss is all that it takes
Even when you knew
It could be a big mistake yeah
I knew right from the start
That if you moved my body
You would move my heart

You know, you know what I want yeah yeah
You know, you know what I want
I want a lover who knows how to please me

I want you to want me
I want you to want me back again
I want you to want me
I want you to want me back again
