

What would you do if I stopped loving you
What would you say if I just walked away
I really gotta tell you baby
last night it crossed my mind

(Verse 1)

What would you do if you came home
and I packed up my clothes and left you
took my love and left you all alone
Baby lately you've been treating me so mean and cold
That's not the way, not the way love goes

Tell me where's the love and tenderness
Where or where did it go
Don't you think that I won't leave you
I'll pack my love and go

Chorus

(Verse 2)

If you think that just because I love you
I will stay and you can treat me any way
That you want to, 'cause last night
when you were fighting me I was thinking
How much better things used to be

Tell me where's the love and tenderness
Where or where did it go
Don't you think that I won't leave you
I'll pack my love and go

Brigde

Baby lately you've been treating me so mean and cold
We argue more than we've been making love baby
I don't wanna be taken for granted anymore
Last night had better be the last or I'm out that door

Chorus
