

Warm red wine you know that place where you take me sometimes  
Where my caress have wings and fly right off my shoulder  
Where I leave my cares behind and for a while have peace of mind  
Help me friend of mine wine take me away  
When my life becomes a grind when I'm weary and tired  
Then I'll tell myself I need a short vacation  
Got to leave this lonely town and you're the quickest way I found  
Help me friend of mine wine take me away  
Wine take me away where I can lose myself  
Take me where I can't even see the light of day  
It's my life and I'm gonna live it it's my will and I'm gonna give it  
Help me friend of mine wine take me away  
Help me friend of mine wine take me away
