

Too near
To a distant radio
Meanwhile
The station's going off
It doesn't get the ratings
Or any steady faces
It's hard to keep it up

Test drive
Does that go through your head
Did you have a better ride
Than the one you're with
It's hard to keep it up
It's hard to keep it up

Chorus #1:
Though it isn't me
I know what you do
Living in a dream
With someone that you used to see
And here i am again
Saying what i always say
I believe in you and you believe in yesterday

Nostalgia
Leaves you pretty worked
Wishing you'd use the cruise control
So i'd stop getting jerked
When i step on the throttle
You hit me with a bottle
Throwing it

Chorus #2:
Look it isn't me
I know what you do
Living in a dream
With someone that you used to see
And here i am again
Saying what i always say
I believe in you and you believe in yesterday

Babe
I'm fading out there
Wait
My future is your plan
What are you gonna do child
Keep me under your hope
Lover

Chorus #3:
Hope it isn't me
I know what you do
Living in a dream
With someone that you used to see
And here i am again
Saying what i always say
I believe in you and you believe in yesterday

I believe in you and you believe in what's his name
I believe in you and you believe in what's his face
I believe in you and you believe in yesterday
