

Diamonds and snow
And crystals that grow
A tune in the trees
That hangs on the breeze
And you bring my love to me
You bring my love to me

If I had a choice of an angel's voice
If I could empower
For one single hour
Then you'd bring your love to me
You'd bring your love to me

And we'd kiss and entwine
For all time

Garlands of flowers
And sweet springtime showers
Your hair in the clouds
Your tresses unwound
And you bring your love to me
You bring your love to me

The patterns and shapes
That fall into place
The light of the moon
That shows me your face
And you bring my love to me
You bring my love to me
And we kiss
And entwine
For all time
For all time, for all time
