Title: You don't know about lonely

download from: <http://www.lyricsdisc.com>

You went crying to the bedroom I ran off to the bar Another piece of heaven gone to hell The words spoke in anger Just tore my world apart And I set there feeling sorry for myself
You dont know about lonley Or how long the nights can be Till you lived through the stories That still live in me You dont know about sadness Till you faced life alone You dont know
I aint nothing without you.
