Title: Your signs

download from: <http://www.lyricsdisc.com>

Got to make a list of what is best.
Got to make fist, and beat against.
Have to leave an impression.
Do you have a suggestion
Im all out of good ideas.
The ones you have are whispered into your ears.
With all you care to share,
How did I end up here

Your signs are pointing to no where.
Thats exactly where I wont go.
Your signs are pointing to no where,
and no one that I know.
Thats all you care to show me

Got to make a list of what is best.
Got to make fist, and beat against.
Have to make this perfectly clear
no more waiting for 1 millions years
for us, in general.
You make the comical
situation I put us in
unfamiliar as foreign lands.

Your signs are pointing to no where.
Thats exactly where I wont go.
Your signs are pointing to no where,
and no one that I know.
Thats all you care to show me

How would like me
Where would you like me to be
And could you make me worry
just a little more.
The way you look at me confuses me.
Even with you next to me,

Your signs are pointing to no where.
Thats exactly where I wont go.
Your signs are pointing to no where,
and no one that I know.
Thats all you care to show me.
